

INNOVATING BEAUTY

LISTEN TO THE EXPERTS

SOPRANO[®]XL

The **Soprano[®]XL** from Alma Lasers is a revolutionary diode laser system for permanent hair removal that is safe, reliable, easy to use – and virtually painless. Here's what a number of your distinguished colleagues from all over the have to say about their experience with the Soprano[®]XL system.

Latin America

"We've seen an increase in patient demand for permanent hair removal services since we switched to the Soprano[®]XL. Patients can't believe how comfortable and fast the IN-Motion[™] technology is, especially once they start to see results so quickly. In fact, we've stopped prescribing analgesics for the procedure or even as a follow-up—that's how painless the treatments are."

Dr. Rafael Nunes, Plastic Surgeon

Slim Clinique Laser Center, Rio De Janeiro, Brazil

"The Soprano[®]XL SHR is the best technology available today for epilation, especially for patients with tanned skin and/or phototypes V and VI. Simply put, hair reduction with the Soprano[®]XL SHR has become the most requested, most popular service our clinics offer."

Dr. Tania Aparecida Meneghel, Dermatologist

Clinica Renaissance, São Paulo, Brazil

"We moved to the Soprano[®]XL because it offered superior hair removal results with virtually no pain for the patient. But we also found the NIR module for deep dermal heating opened up a whole new set of patient referrals for our office. Being able to offer therapeutic services in addition to aesthetic has delivered significant value for our community and the surrounding area."

Dr. Guilherme O. Olsen de Almeida, Dermatologist

Clinica Dermatológica, São Paulo, Brazil

"With no gels or disposables, the Soprano[®]XL SHR has created significant cost savings for our practice over time. When we compared our increased patient throughput and faster turnaround times, we were able to see more patients, quicker, with Alma Lasers technologies. The fact we could use Alma-supplied marketing materials for patients also helped us stay within our budget."

Dr. Sergio Korzin, MD

Director of Lasermed SA, Buenos Aires, Argentina

"The Soprano[®]XL, with its capacity of 10 Hz, provides a pain free procedure which is three times faster than conventional treatments. At last, with the Soprano[®]XL, it is possible to safely treat sun tanned skin."

Dr. Giovanni Bojanini Morron, MD

Centro Dermatologico Giovanni Bojanini, Bogotá, Colombia

"Safety and effectiveness were the two primary objectives we set out to fulfill when we were selecting a laser hair removal system. Fortunately, with Alma Lasers Soprano[®]XL we got both. The 810-nm diode continues to produce consistent results for patients of all skin types—including tanned skin."

Edgardo Chouela, MD, PhD

Executive director of Chouela Center, Chouela Dermatologia Clinic, Buenos Aires, Argentina

"I believe SHR is the first innovation in laser hair removal in the past 10 years. We are now able to treat all skin types safely, with less pain"

Dr. Martin Braun, MD

Vancouver Laser Center, Vancouver, BC, Canada

"This laser is an extremely safe modality. It has given our practice a competitive edge. Most of our patients who have been treated elsewhere comment that the Soprano^{XL} is much less painful than traditional hair removal, is quicker and does a better job."

Mary Holmes, PA-C

Co-Owner and Operator, Davis Laser Center, Davis, CA, USA

"Simply said, SHR is the wave of future for all hair removal. IN-Motion technology is the most efficacious way to treat and remove hair from large body areas. I can do a full back in 30 minutes. It is my professional opinion the Alma Lasers Soprano^{XL} SHR 810 diode is way ahead of its time and the gold standard for laser hair removal."

Dr. John Hamel, MD

Boarded in Anti-Aging Medicine and Emergency Medicine, Hickory, NC, USA

"The Soprano^{XL} is a great advancement in laser hair removal. The ability to treat all skin types, combined with patient comfort and satisfaction, has made the Soprano^{XL} the most consistent revenue producer in my cosmetic dermatology practice. The Soprano^{XL} is in use eight to ten hours per day and has never required any maintenance."

Dr. Victoria A. Cirillo-Hyland, MD

Board Certified Dermatologist, Bryn Mawr, PA, USA

"It is the perfect solution for practitioners with a higher volume of hair removal patients. Reliable results achieved with better performance and an improved safety profile."

Dr. Michael H. Gold, MD

Gold Skin Care Center, Tennessee Clinical Research Center, Nashville, TN, USA

“We use the Soprano^{XL} in our Laserklinik Karlsruhe. The nearly pain free SHR mode is highly appreciated by our patients. And the possibility to treat darker or tanned skin types is a great advantage. The device works very reliably.”

Prof. Christian Raulin, Dermatologist

Laserklinik Karlsruhe, Germany

“We offer a wide range of treatment modalities for clients seeking to remove unwanted hair using technology supplied by ABC Lasers. The Soprano^{XL} has enabled us to provide previously unavailable pain-free treatment and successfully include darker skin types in our patient pool. We recommend the Soprano^{XL} without reservation.”

Dr. Peter Ilori

Founder of 'The Beauty Society' - a premier provider of medical spa & aesthetic, UK

“I am happy to confirm that the Soprano^{XL} Hair Removal system has been very well received by our patients and that they have all been truly amazed that it is a pain free treatment. The staff have found the laser system very easy and safe to use and we have been very pleased with the service and support we have received.”

Dr. Rita Rakus MBBS

Founder member of the BACD Clinic in Knightsbridge, UK

“Summer time used to be the most challenging for us because it was the high demand season for hair removal, but many patients had to wait for treatment because their skin was tanned. Now with Soprano^{XL} with SHR we can offer virtually painless hair removal at any time of year for all skin and hair types, even for patients who have already been out in the sun.”

Dr. Gérard Boutboul

President of the French Society for Lipoplastic and a member of the French Society for Aesthetic Medicine, Marseille, France

“Soprano^{XL} SHR has revolutionized medical photoepilation, contributing longer lasting and better results compared to conventional technologies. ‘IN-Motion’ treatment, applying low fluences at high repetition rates, enables us to provide customized photoepilation for each patient. Soprano^{XL} works with all skin and hair types, all year round, with consistent, safe, reliable results. Today Soprano^{XL} SHR is an essential tool for aesthetic practices, providing more patient advantages than any of its competitors”

Dr. Fernando Urdiales, MD

Director of Miramar Medical Institute, Malaga, Spain.

“The introduction of the Soprano^{XL} has given our aesthetic practice a great competitive edge. The safety and efficacy of this unique IN-Motion SHR technology have given our patients reliable and pain-free treatments that are unparalleled. With the 810-nm diode system, we are able to obtain consistent results in all skin types—including tanned skin. Furthermore the system is extremely reliable and despite our heavy work load, we have not required maintenance in over a year.”

Dr. Maria Angelo-Khattar, PhD

Managing Director and Founder of Aesthetica Clinic, Dubai Healthcare City & Hamarain Centre, UAE

“In a multicentre study on epilation efficacy using an 810 nm diode laser at low fluence conducted on patients phototype III to V - Treatment was easily implemented and comfortable with no adverse signs, and patients expressed a high degree of satisfaction with the results. Hair removal was of high efficacy and comparable to common photoepilation. These achievements make the Soprano^{XL} recommendable for the treatment of unwanted hair in dark skinned patients.”

Mario A. Trelles, MD, PhD

Instituto Medico Vilafortuny, Tarragona, Spain

“I can personally say the Soprano^{XL} is ‘the gold standard’ of the next generation of hair removal. Just the fact of the simplicity of the machine itself. I can concur that anyone can effectively use this laser with unprecedented results compared to what is offered on the market today. The machine does everything for you, it takes the guesswork and risk out of doing laser hair removal efficiently.”

Dr. Scott Scherer

Renaissance Clinique, Stockholm, Sweden

“The Soprano^{XL} with SHR has proved extremely reliable for our clinic, even when we’ve had back-to-back patient bookings for weeks on end. The technology simply doesn’t go down—even under heavy use. When we first started offering Pain-Free, Hair-Free™ treatments, we had a single machine we wheeled between multiple patient rooms without a problem. The fast treatment times because of the 12 x 10 spot size have also helped us improve our patient throughput.”

Dr. Yang Rongya, MD
Dermatology Department of General Military Hospital, Beijing, China

“Our clinical staff appreciates how easy-to-use the new Soprano^{XL} is, with the large color screen and simple touch technology. We can provide routine treatments very quickly, while still ensuring the highest safety protocols are in place for patients.”

Dr. Ganesh Pai, Dermatologist
Derma Care, Mangalore, India

“Soprano^{XL} has given my practice an additional dimension of clientele. The fact it can operate year round on all skin and hair types has attracted younger clients who see long term hair removal as an investment in beauty.”

Dr. Apratim Goel, Dermatologist
Class Clinic, Mumbai, India

“I found Soprano^{XL} is the optimal choice for the Korean, who has relatively darker skin than the Caucasian. Due to the super fast frequency of 10 Hz, the Soprano^{XL} SHR is truly a fast, very safe hair removal modality for Asian skin.”

Dr. Yang Joon Sung, Dermatologist
Beautiful Skin Clinic, Korea

“My hair removal patients now come in requesting laser procedures and oftentimes Soprano^{XL} by name. They have heard from friends about how painless the procedure is with no downtime and they are eager to see smoother skin with long-lasting results for themselves.”

Dr. Hema Pant, Dermatologist
Kaya Skin Clinic, New Delhi, India

“The Soprano^{XL} SHR has proven to be quite an effective treatment modality for laser hair removal on Indian skin as we have grown our practice to include multiple modalities and technologies over the years. I upgraded from Soprano to Soprano^{XL} SHR and can add modules like SR & ST as and when needed”

Dr. Munish Shah, Plastic Surgeon
Kala Laser & Cosmetic Surgery Centre
Vadodara, India

“Soprano^{XL} SHR hair removal has become the most popular service our clinic offer. The treatment is convenient for the physician and comfortable for the patient. The results are so satisfying. I can truly say that the Soprano^{XL} is the patient’s preferable choice for laser hair removal”

Dr. Woraphong Manuskiatti, M.D.
Department of Dermatology
Sirinaj Hospital, Bangkok, Thailand
